Human Glutamate Decarboxylase Like Protein 1 (GADL1) ELISA Kit BYT-ORB780054

| | |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname | Human Glutamate Decarboxylase Like Protein 1 (GADL1) ELISA Kit |
| Artikelnummer | BYT-ORB780054 |
| Hersteller Artikelnummer | orb780054 |
| Alternativnummer | BYT-ORB780054-48, BYT-ORB780054-96 |
| Hersteller | Biorbyt |
| Kategorie | Kits/Assays |
| Applikation | ELISA |
| Spezies Reaktivität | Human |
| Produktbeschreibung | The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Glutamate Decarboxylase Like Protein 1(GADL1).... |
| Konzentration | 20 ng/mL |
| Detektionsbereich | 0.32-20 ng/mL |
| Sensitivitaet | 0.12 ng/mL |
| UniProt | Q6ZQY3 |
| Proben | Tissue homogenates and other biological fluids. |

| Anwendungsbeschreibung | <p>Application Notes: standard: 20 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human GADL1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human GADL1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human GADL1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human GADL1 in the samples is then determined by comparing the OD of the samples to the standard curve</p> |
