Mouse Immunoglobulin M (IgM) ELISA Kit BYT-ORB781500

Artikelname	Mouse Immunoglobulin M (IgM) ELISA Kit
Artikelnummer	BYT-ORB781500
Hersteller Artikelnummer	orb781500
Alternativnummer	BYT-ORB781500-48, BYT-ORB781500-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Mouse
Produktbeschreibung	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Immunoglobulin M(IgM)....
Konzentration	1000 ng/mL
Detektionsbereich	3.13-200 µg/mL
Sensitivitaet	1.35 ug/mL
UniProt	P01872
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Application Notes: standard: 200 µg/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse IgM. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse IgM. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse IgM, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse IgM in the samples is then determined by comparing the OD of the samples to the standard curve
