Product Datasheet

Human Pulmonary surfactant-Associated Protein D (SP-D) ELISA Kit BYT-ORB782355

Artikelname	Human Pulmonary surfactant-Associated Protein D (SP-D) ELISA Kit
Artikelnummer	BYT-ORB782355
Hersteller Artikelnummer	orb782355
Alternativnummer	BYT-ORB782355-48, BYT-ORB782355-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human
Produktbeschreibung	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to SP-D(Pulmonary surfactant-associated protein D)....
Konzentration	80 ng/mL
Detektionsbereich	1.25-80 ng/mL
Sensitivitaet	0.53 ng/mL
UniProt	P35247
Proben	serum, plasma, tissue homogenates, cell lysates, lung lavage fluid, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Application Notes: standard: 80 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human SP-D. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human SP-D. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human SP-D, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human SP-D in the samples is then determined by comparing the OD of the samples to the standard curve
