| Immunogen                | Recombinant full-length human CEA protein                                                                                                                                                                                                                     |
| Produktbeschreibung      | This antibody recognizes proteins of 80-200kDa, identified as different members of CEA family. CEA is synthesized during development in the fetal gut and is re-expressed in increased amounts in intestinal carcinomas and several other tumors. This MAb... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
