Product Datasheet

HPSE Active ABI-32-6806

Artikelname	HPSE Active
Artikelnummer	ABI-32-6806
Hersteller Artikelnummer	32-6806
Alternativnummer	ABI-32-6806-4UG
Hersteller	Abeomics
Kategorie	Proteine/Peptide
Applikation	FA
Produktbeschreibung	Heparanase is an endo Beta-D-glucuronidase, which degrades heparan sulfate side chains of heparan sulfate proteoglycans (HSPGs) in the extracellular matrix. Heparanase plays an important role in ECM degradation, facilitating the migration and extrava...
Reinheit	Greater than 95.0% as determined by: (a) Analysis by RP-HPLC. (b) Analysis by SDS-PAGE.
Application Verdünnung	The specific activity of Heparanase Active Enzyme in-house standard is about 0.7 Units (1 unit = 1 µmole of reducing ends of heparan sulfate substrate formed per minute per mg Heparanase Active Enzyme at 37C). The enzymatic activity of each Heparanase Act
