| Applikation              | FACS                                                                                                                                                                                                                                                          |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant MBD1 protein (amino acids 291-586) was used as the immunogen for this antibody.                                                                                                                                                  |
| Konjugation              | FITC                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | MBD1 (Methyl-CpG-Binding Domain Protein 1) protein is a primary candidate for the readout of DNA methylation as it recruits chromatin remodelers, histone deacetylases and methylases to methylated DNA associated with gene repression. This protein, a m... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [ABM15H2]                                                                                                                                                                                                                                                     |
