| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant UBE1L2 protein (amino acids 710-955) was used as the immunogen for this antibody.                                                                                                                                                |
| Produktbeschreibung      | Uba6/UBE1L2/MOP-4 is an ubiquitin-specific E1 type enzyme, homolog of the ubiquitin-activating enzyme, Uba1, which activates two ubiquitin-like proteins (UBLs), ubiquitin and FAT10. Some recent experiments suggest a testis-specific function of UBE1L2... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
