| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant MRF2 protein (amino acids 430-621) was used as the immunogen for this antibody.                                                                                                                                                  |
| Produktbeschreibung      | MRF2 (Modulator Recognition Factor-2) is a member of the ARID (AT-Rich Interaction Domain) family of transcription factors. The ARID defines a highly conserved sequence specific DNA binding domain and has been identified in proteins of yeast, Drosoph... |
