| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Mouse                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant m ifi-204 protein (amino acids 1-250) was used as the immunogen for this antibody.                                                                                                                                               |
| Produktbeschreibung      | Interferon-activable protein 204 (Ifi-204) is a primarily nuclear phosphoprotein which inhibits cell growth, in part by modulating transcriptional activity of NFkB, E2F, AP-1, p53 and RB1-dependent and independent pathways. it also inhibits transcrip... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
