| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant Vimentin protein (amino acids 52-231) was used as the immunogen for this antibody.                                                                                                                                               |
| Produktbeschreibung      | Vimentin is a major constituent of the intermediate filament family of proteins whose expression correlates with increased metastatic disease, reduced patient survival and poor prognosis across multiple tumor types. It is ubiquitously expressed in no... |
