| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant Exportin-4 protein (amino acids 775-1,000) was used as the immunogen for this antibody.                                                                                                                                          |
| Produktbeschreibung      | Exportin-4 or XPO4 belongs to a large family of nucleoproteins that mediate the transport of proteins and other cargo between the nuclear and cytoplasmic compartments. Exportin-4 is a RanGTP-binding protein and functions as a receptor for nuclear exp... |
