## Product Datasheet

### **Phospho-4E-BP1 (Thr37/46) (Clone: A5) rabbit mAb APC conjugate, Clone: [4EB1T37T46-A5], Rabbit, Monoclonal ABI-12-4151-10**

|                          |                                                                                                                                                                                                                                                               |

| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                | A synthetic phospho-peptide corresponding to residues surrounding Thr37/46 of human phospho 4E-BP1                                                                                                                                                            |
| Konjugation              | APC                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | 4E-BP1 regulates protein translations induced by upstream signals initiated by ERK1/2 MAP kinase or PI3-Kinase/AKT/mTOR pathways. Ultimately activation of mTOR, positively stimulates mRNA translation by its two dominant downstream substrates: ribosom... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [4EB1T37T46-A5]                                                                                                                                                                                                                                               |

|                        |                                                                                                                                                                                                                               |

| Formulierung           | Conjugated                                                                                                                                                                                                                    |
| Application Verdünnung | For flow cytometric staining, the suggested use of this reagent is 5 µL per million cells or 5 µL per 100 µL of staining volume. It is recommended that the reagent be titrated for optimal performance for each application. |
