| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                           |
| Immunogen                | Recombinant human full-length protein                                                                                                                                                                                                                           |
| Produktbeschreibung      | Gelsolin (also known as brevin, Actin-depolymerizing factor or ADF), a protein of leukocytes, platelets and other cells, severs Actin filaments in the presence of submicromolar calcium, thereby isolating cytoplasmic Actin gels. It is a calcium-regulate... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                      |
| Klon-Bezeichnung         | [CPTC-Gelsolin-1]                                                                                                                                                                                                                                               |
