| Immunogen                | Recombinant full-length human GYPA protein                                                                                                                                                                                                                    |
| Produktbeschreibung      | Recognizes a sialoglycoprotein of 39kDa, identified as glycophorin A (GPA). It is present on red blood cells (RBC) and erythroid precursor cells. It has been shown that glycophorin acts as the receptor for Sandei virus and parvovirus. Glycophorins A ... |
