| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant human MCP protein                                                                                                                                                                                                                                 |
| Produktbeschreibung      | Recognizes a protein of 52kDa-58kDa, identified as CD46. CD46 exists as many isoforms in a variety of tissues. It is strongly expressed on salivary gland ducts and kidney ducts, moderately on lymphocytes and endothelium, and weakly on interstitial ti... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [MCP/931]                                                                                                                                                                                                                                                     |
