| Immunogen                | Recombinant human NOX4 protein                                                                                                                                                                                                                                |
| Produktbeschreibung      | The superoxide-generating NADPH oxidase includes a membrane-bound flavocytochrome containing two subunits, gp91-phox and p22-phox, and the cytosolic proteins p47-phox and p67-phox. During activation of the NADPH oxidase, p47-phox and p67-phox migrate... |
