| Kategorie                | Antikörper                                                                                                                                                                                                                                                   |
| Applikation              | ELISA, FA                                                                                                                                                                                                                                                    |
| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                            |
| Immunogen                | Full length recombinant human TGF-alfabeta2 protein                                                                                                                                                                                                          |
| Produktbeschreibung      | This MAb recognizes TGF-alfabeta 1, 2 and 3. TGF-alfas inhibit the growth of epithelial cells and stimulate the growth of mesenchymal cells. Most breast lesions, benign and malignant, involve abnormal proliferation and altered architecture of stroma... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                   |
| Klon-Bezeichnung         | [TGF-alpha/510]                                                                                                                                                                                                                                              |
