## Product Datasheet

**Anti-HSV1 (Herpes Simplex Virus Type I) Monoclonal Antibody(Clone:  
HSVI/2095), Clone: [HSVI/2095], Mouse  
ABI-36-3787**

|                          |                                                                                                                                                                                                                                                               |

| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC                                                                                                                                                                                                                                                           |
| Immunogen                | Baculovirus-expressed HSV DNA polymerase (POL) and POL/UL42 complex                                                                                                                                                                                           |
| Produktbeschreibung      | The antibody reacts with HSV type 1 specific antigen. It is suitable for detection of HSV in human cellular material obtained from superficial lesions or biopsies and for the early identification of HSV in infected tissue cultures. The herpes simplex... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [HSVI/2095]                                                                                                                                                                                                                                                   |
| Application Verdünnung   | Immunohistochemistry (Formalin-fixed) (1-2ug/ml for 30 minutes at RT)(Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95&degC followed by cooling at RT for 20 minutes),                |
