| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Microtubules from chicken embryo brain.                                                                                                                                                                                                                       |
| Produktbeschreibung      | Alpha-tubulin(b-alpha-1) mRNA is expressed only in brain with a molecular weight of about 55,000. The 3-prime UTR of b-alpha-1 is more than 80% homologous to the UTR of the rat brain alpha-tubulin gene, IL-alpha-T1. B-alpha-1 encodes a predicted 451-... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
