| Applikation              | ELISA, ICC, WB                                                                                                                                                                                                                                                |
| Spezies Reaktivität      | Drosophila                                                                                                                                                                                                                                                    |
| Immunogen                | Prepared from Drosophila tissue culture cells heat shocked at 36.5C for 3 hours, and isolated using SDS PAGE.                                                                                                                                                 |
| Konjugation              | ATTO-594                                                                                                                                                                                                                                                      |
| Produktbeschreibung      | HSP70 genes encode abundant heat-inducible 70-kDa HSPs (HSP70s). In most eukaryotes HSP70 genes exist as part of a multigene family. They are found in most cellular compartments of eukaryotes including nuclei, mitochondria, chloroplasts, the endoplas... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [7FB]                                                                                                                                                                                                                                                         |

|                        |                                                                             |
