| Alternativnummer         | KAB-PRA-MM201-UL-100UG, KAB-PRA-MM201-UL-500UG                                                                                     |
| Hersteller               | KactusBio                                                                                                                          |
| Kategorie                | Proteine/Peptide                                                                                                                   |
| Spezies Reaktivität      | Mouse                                                                                                                              |
| Produktbeschreibung      | Recombinant Mouse PILRA Protein is expressed from HEK293 with hFc (IgG1) tag at the C-Terminus.It contains Glu32-Val197....        |
| Molekulargewicht         | The protein has a predicted MW of 45.4 kDa. Due to glycosylation, the protein migrates to 70-75 kDa based on Bis-Tris PAGE result. |
| Tag                      | C-hFc (IgG1)                                                                                                                       |
| UniProt                  | <a href="#">Q2YFS3</a>                                                                                                             |
| Puffer                   | Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.     |
| Expression System        | HEK293                                                                                                                             |
| Reinheit                 | > 95% as determined by Bis-Tris PAGE,> 95% as determined by HPLC                                                                   |
| Formulierung             | Lyophilized                                                                                                                        |

|                  |              |
