Anti-Ms CD86 Purified Low Endotoxin, Clone: [GL-1], Monoclonal EXB-12-628-C100

| | |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname | Anti-Ms CD86 Purified Low Endotoxin, Clone: [GL-1], Monoclonal |
| Artikelnummer | EXB-12-628-C100 |
| Hersteller Artikelnummer | 12-628-C100 |
| Alternativnummer | EXB-12-628-C100 |
| Hersteller | EXBIO |
| Kategorie | Antikörper |
| Applikation | FA, FC, ICC, IHC-Fr, IP |
| Spezies Reaktivität | Mouse |
| Immunogen | LPS-activated CBA/Cs mouse splenic B cells |
| Produktbeschreibung | CD80 (B7-1) and CD86 (B7-2) are ligands of T cell critical costimulatory molecule CD28 and of an inhibitory receptor CTLA-4 (CD152). The both B7 molecules are expressed on professional antigen-presenting cells and are essential for T cell activation,... |
| Klonalität | Monoclonal |
| Konzentration | 1 mg/ml |
| Klon-Bezeichnung | [GL-1] |
| Isotyp | Rat IgG2a kappa |
| Puffer | Phosphate buffered saline (PBS), pH 7.4 |
| Lagerung | 2°C to 8°C |

| | |
|------------------------|------------------------------------------------------------------------------------------------------------------------|
| Target-Kategorie | CD86 |
| Antibody Type | Monoclonal Antibody |
| Anwendungsbeschreibung | Functional application: Blocking. Flow cytometry: Recommended dilution: 2 µg/ml, positive control: murine splenocytes. |
