| Immunogen                | Recombinant protein within human DNMT3A aa 1-300.                                                                                                                                                                                                             |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | CpG methylation is an epigenetic modification that is important for embryonic development, imprinting, and X-chromosome inactivation. Studies in mice have demonstrated that DNA methylation is required for mammalian development. This gene encodes a DN... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/mL.                                                                                                                                                                                                                                                      |
| Molekulargewicht         | Predicted band size 102 kDa.                                                                                                                                                                                                                                  |
| Isotyp                   | IgG                                                                                                                                                                                                                                                           |
