Anwendungsbeschreibung	<p>This immunoconjugate is not species-specific since inter-species cross-reactivity is a normal feature of antisera to immunoglobulins, However this conjugate has been passed over appropriate immuno-adsorbents to remove antibodies cross-reacting with Human immunoglobulins, This renders it specific for use in test systems containing material of Human origin (e.g, Human tissue/Mouse monoclonal antibody to a Human tissue constituent/anti Mouse Ig isotype-specific immunoconjugate</p>
