Goat IgG anti-Mouse IgG+IgM+IgA (H+L)-Biotin, MinX Bo,Ho,Hu DNA-SEC-183156

Artikelname	Goat IgG anti-Mouse IgG+IgM+IgA (H+L)-Biotin, MinX Bo,Ho,Hu
Artikelnummer	DNA-SEC-183156
Hersteller Artikelnummer	SEC-183156
Alternativnummer	DNA-SEC-183156
Hersteller	dianova
Wirt	Goat
Kategorie	Antikörper
Applikation	ELISA,IHC,WB
Spezies Reaktivität	Mouse
Immunogen	Mouse IgG IgA and IgM whole molecule
Konjugation	Biotin
Format	IgG
Spezifität	IgG+IgM+IgA (H+L)
Minimale Kreuzreaktivität (MinX)	Bovine,Equine,Human
Produktbeschreibung	Anti-Mouse IgG IgA IgM Biotin Antibody generated in goat detects reactivity to Mouse IgG, Mouse IgA, and Mouse IgM. Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunog...
Klonalität	Polyclonal

Konzentration	1.0 mg/mL
Isotyp	Ig
Puffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Reinheit	This product was prepared from polyspecific antiserum by immunoaffinity chromatography using antigens coupled to agarose beads followed by cross adsorption to remove unwanted specificities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Biotin, anti-Goat Serum, Mouse IgG, Mouse IgA and Mouse IgM. No reaction was observed against bovine, horse or human serum proteins. This reagent is suitable for the detection of all mouse isotypes and chain combinations. ELISA was used to confirm specificity at less than 1% of the target signal.
Formulierung	Lyophilized
Formel	20 mM K3PO4,150 mM NaCl,pH 7,2,lyophilisate,0,01% NaN3
Target-Kategorie	Mouse
Antibody Type	Secondary Antibody
Application Verdünnung	ELISA Dilution: 1:300,000, Fluorochrome Protein Value: 10-20, Immunohistochemistry Dilution: 1:1,500 - 1:15,000, Western Blot Dilution: 1:3,000 - 1:30,000
Anwendungsbeschreibung	Immunoblotting, ELISA, immunohistochemistry, immunomicroscopy as well as other antibody based assays using streptavidin or avidin conjugates requiring lot-to-lot consistency.
