Goat anti Human alpha-1 lipoprotein, Clone: [Polyclonal], Monoclonal NMB-GAHU/A1LP(HDL)

Article Name	Goat anti Human alpha-1 lipoprotein, Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAHU/A1LP(HDL)
Supplier Catalog Number	GAHu/A1Lp(HDL)
Alternative Catalog Number	NMB-GAHU/A1LP(HDL)
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Product Description	The reactivity of the antiserum is restricted to alpha-1 lipoprotein. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against fresh normal human plasma a single precipitin line is obtained whi...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
Buffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Source	Alpha-1 lipoproteins are completely different from beta-lipoproteins. In fresh serum only one alpha-1 lipoprotein exists immunologically, but after centrifugation, storage, freezing and thawing two types of alpha-1 lipoprotein with difference in mobility

Formula	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Application Notes	Precipitation assays. The lyophilized antiserum is shipped at ambient temperature and may be stored at +4C, prolonged storage at or below -20C. Reconstitute the lyophilized antiserum by adding 1 ml sterile distilled water. Dilutions may be prepared by
