Goat anti Human C-reactive protein, Clone: [Polyclonal], Monoclonal NMB-GAHU/CRP

Article Name	Goat anti Human C-reactive protein, Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAHU/CRP
Supplier Catalog Number	GAHu/CRP
Alternative Catalog Number	NMB-GAHU/CRP
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Product Description	The reactivity of the antiserum is restricted to C-reactive protein. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against fresh normal human plasma a single precipitin line is obtained whic...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
UniProt	P02741
Buffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized an
Source	C-reactive protein is an acute phase protein, synthesized in the liver. Its molecular weight is about 140,000. It occurs in serum of healthy men in low concentrations, <1.2 µg/ml. In cases of bacterial infection, surgical trauma and Hodgkins disease, h

Formula	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Application Notes	Precipitation assays. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4C, not refrozen, and preferably used the same day.
