### Goat IgG anti-Human IgD-FITC, MinX none NMB-SR/GAHU/IGD(FC)/FITC

|                            |   |
|----------------------------|---|
| Article Name               | Goat IgG anti-Human IgD-FITC, MinX none   |
| Biozol Catalog Number      | NMB-SR/GAHU/IGD(FC)/FITC  |
| Supplier Catalog Number    | SR/GAHu/IgD(Fc)/FITC  |
| Alternative Catalog Number | NMB-SR/GAHU/IGD(FC)/FITC  |
| Manufacturer               | NordicMubio   |
| Host                       | Goat  |
| Category                   | Antikörper  |
| Species Reactivity         | Human   |
| Conjugation                | FITC  |
| Format                     | IgG   |
| Target Specificity         | IgD   |
| Cross-Adsorption (MinX)    | no cross-adsorbtion   |
| Product Description        | The reactivity of the antiserum is directed to the Fc subunit of the IgD molecule, which expresses strict (class) specificity. In immunoelectrophoresis and radial in immunodiffusion using various antiserum concentrations against human serum, a single... |
| Clonality                  | Polyclonal  |
| Clone Designation          | [Polyclonal]  |

|                   |   |
|-------------------|---|
| Buffer            | FITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun down |
| Source            | Pools of purified homogenous IgD isolated from human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.   |
| Formula           | FITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.   |
| Antibody Type     | Secondary Antibody  |
| Application Notes | ELISA, Immunocytochemistry, Immunohistochemistry (frozen), (In)direct immunofluorescence.   |
