### Goat anti Human lactoferrin, conjugated with Biotin, Clone: [Polyclonal], Monoclonal NMB-GAHU/LFR/BIO

Article Name	Goat anti Human lactoferrin, conjugated with Biotin, Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAHU/LFR/BIO
Supplier Catalog Number	GAHu/Lfr/Bio
Alternative Catalog Number	NMB-GAHU/LFR/BIO
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Conjugation	Biotin
Product Description	In immunoelectrophoresis against human milk a single precipitin line is obtained. The antiserum does not react with any other protein component of human serum or plasma. In immunocytochemical and immunohistochemical techniques for the detection of hu...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
UniProt	<a href="#">P02788</a>
Buffer	Biotin-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.

Source	Exocrine organs produce various secretions, each with its characteristic function. Proteins found in secretions may be divided into two groups: those specific for the particular secretion, and plasma proteins independent of the type of exocrine cells. Lac
Form	Biotin
Formula	Biotin-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.
Application Notes	ELISA, Immunocytochemistry, Immunohistochemistry (paraffin), Dot blot, Immunoblotting. The lyophilized conjugate is shipped at ambient temperature and may be stored at +4C, prolonged storage at or below -20C. It is reconstituted by adding 1 ml sterile distilled water, spun down to remove insoluble particles, divided into small aliquots, frozen and stored at or below -20C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided.
