### Goat anti Human Serum proteins, Clone: [Polyclonal], Monoclonal NMB-GAHU/TSP

Article Name	Goat anti Human Serum proteins, Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAHU/TSP
Supplier Catalog Number	GAHu/TSP
Alternative Catalog Number	NMB-GAHU/TSP
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Product Description	In immunoelectrophoresis against pooled serum and enriched serum proteins fractions precipitation can be observed of not less than 16 individual proteins components. In precipitating techniques as immunoelectrophoresis and radial immunodiffusion (Ouc...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
Buffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized a
Source	Pooled whole human serum and partly purified serum fractions. Freunds complete adjuvant is used in the first step of the immunization procedure.

Formula	<p>Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.</p>
Application Notes	<p>Precipitation assays. In immunoelectrophoresis use 2 µl serum or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl serum samples (neat and serially diluted in 2 mm diameter peripheral wells). Different bleedings of the immunized animals are pooled to obtain a broad spectrum balanced against the varying concentrations of the individual serum protein components.</p>
