Product Datasheet

Goat anti Mouse fibrinogen, Clone: [Polyclonal], Monoclonal NMB-GAM/FBG

Article Name	Goat anti Mouse fibrinogen, Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAM/FBG
Supplier Catalog Number	GAM/Fbg
Alternative Catalog Number	NMB-GAM/FBG
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Product Description	The reactivity of the antiserum is restricted to mouse fibrinogen molecule. In immunolectrophoresis and radial immunodiffusion, using various antiserum concentrations against normal mouse plasma a single precipitin line is obtained which shows a rea...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
Buffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added as it may interfere with the antibody activity. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign
Source	Fibrinogen (clotting factor I) is a heat labile beta glycoprotein present in plasma. It is the precursor of fibrin, which is the key protein constituting the network of the blood clot. Thrombin converts fibrinogen to fibrin by limited proteolysis. Fibrin

Formula	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added as it may interfere with the antibody activity. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign
Application Notes	Precipitation assays. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4C, not refrozen, and preferably used the same day.
