| Alternative Catalog Number | VZB-RC201-50                                                                                                                                                                                                                                                              |
| Manufacturer               | Vazyme Biotech                                                                                                                                                                                                                                                            |
| Category                   | Kits/Assays                                                                                                                                                                                                                                                               |
| Product Description        | 1. The kit is suitable for the extraction of small RNAs (miRNA, <200 nt) from fewer than 5 * 10 <sup>6</sup> eukaryotic cells or less than 100 mg of animal tissues. 2. The obtained miRNAs can be directly used for chip analysis, Northern hybridization, RT-PCR and... |
| Application Notes          | RNA Isolation (Column)                                                                                                                                                                                                                                                    |
