| Category                   | Proteine/Peptide                                                                                                                                                                                                                                  |
| Product Description        | CD248 is believed to play a role in tumor angiogenesis. CD248 is being investigated as a potential target for cancer treatment....                                                                                                                |
| NCBI                       | <a href="#">57124</a>                                                                                                                                                                                                                             |
| UniProt                    | <a href="#">Q9HCU0</a>                                                                                                                                                                                                                            |
| Form                       | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                              |
| Target                     | The synthetic peptide sequence used to generate the antibody AP6756b was selected from the C-term region of human CD248. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
