HLA-DRA Antibody (C-term) Blocking Peptide ABT-BP6799B

Article Name	HLA-DRA Antibody (C-term) Blocking Peptide
Biozol Catalog Number	ABT-BP6799B
Supplier Catalog Number	BP6799b
Alternative Catalog Number	ABT-BP6799B-500UG
Manufacturer	Abcepta
Category	Proteine/Peptide
Product Description	HLA-DRA is one of the HLA class II alpha chain paralogues. This class II molecule is a heterodimer consisting of an alpha and a beta chain, both anchored in the membrane. It plays a central role in the immune system by presenting peptides derived from various proteins. The synthetic peptide sequence used to generate the antibody AP6799b was selected from the C-term region of human HLA-DRA. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.
NCBI	3122
UniProt	P01903
Form	Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.
Target	The synthetic peptide sequence used to generate the antibody AP6799b was selected from the C-term region of human HLA-DRA. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.
