| UniProt                    | <a href="#">Q86TM3</a>                                                                                                                                                                                                                            |
| Form                       | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                              |
| Target                     | The synthetic peptide sequence used to generate the antibody AP7491b was selected from the C-term region of human DDX53. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
