| Form                       | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.  |
| Target                     | The synthetic peptide sequence used to generate the antibody AP8455b was selected from the C-term region of human DUSP13-L184. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.         |
