| Form                       | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.   |
| Target                     | The synthetic peptide sequence used to generate the antibody AP8516c was selected from the Center region of human ARHGAP18. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
