| Category                   | Proteine/Peptide                                                                                                                                                                                                                              |
| Product Description        | DAB2 is the component of the CSF-1 signal transduction pathway....                                                                                                                                                                            |
| NCBI                       | <a href="#">1601</a>                                                                                                                                                                                                                          |
| UniProt                    | <a href="#">P98082</a>                                                                                                                                                                                                                        |
| Form                       | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                          |
| Target                     | The synthetic peptide sequence used to generate the antibody AP8987b was selected from the C-term region of humanB2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay. |
