| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | SFRP1 encodes a member of the SFRP family that contains a cysteine-rich domain homologous to the putative Wnt-binding site of Frizzled proteins. Members of this family act as soluble modulators of Wnt signaling, epigenetic silencing of SFRP genes lea... |

| UniProt                    | <a href="#">Q8N474</a>                                                                                                                                                                                                                                        |
| Form                       | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                          |
| Target                     | The synthetic peptide sequence used to generate the antibody AP9037a was selected from the N-term region of human SFRP1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.             |
