| Category                   | Proteine/Peptide                                                                                                                                                                                                                                                |
| Product Description        | SARS-CoV nucleocapsid protein is highly phosphorylated, basic, structural protein that forms a helical ribonucleoprotein complex with viral RNA, to form a complex that comprises the core structure of the SARS-CoV virion. SARS-CoV NP is thought to be in... |
| NCBI                       | <a href="#">43740575</a>                                                                                                                                                                                                                                        |
| UniProt                    | <a href="#">P0DTC9</a>                                                                                                                                                                                                                                          |
| Form                       | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                            |
