## **Product Datasheet**

## MBQ-167, CAS [[2097938-73-1]] FBM-10-4434

| Article Name               | MBQ-167, CAS [[2097938-73-1]]    |
|----------------------------|----------------------------------|
| Biozol Catalog Number      | FBM-10-4434                      |
| Supplier Catalog Number    | 10-4434                          |
| Alternative Catalog Number | FBM-10-4434-5MG,FBM-10-4434-25MG |
| Manufacturer               | Focus Biomolecules               |
| Category                   | Biochemikalien                   |
| Product Description        | Rac/Cdc42 inhibitor              |
| Molecular Weight           | 338.41                           |
| Purity                     | >98% by HPLC NMR (Conforms)      |
| Form                       | Off-white solid                  |
| CAS Number                 | [2097938-73-1]                   |
| Formula                    | C22H18N4                         |

**Application Notes** 

Dual inhibitor of the Rho GTPases Rac (IC50 = 103 nM) and Cdc42 (IC50 = 78 nM).1 It inhibits breast cancer cell migration, viability, and mammosphere formation. MBQ-167 induced polarity loss resulting in 95% cell rounding and detachment from the substratum in metastatic MDA-MB-231 cells and was active in GFP-HER2-BM, MDA-MB-468, and Hs578t breast cancer cells as well as Mia-PaCa-2 pancreatic cancer cells, SKOV3 ovarian cancer cells, AGS and NCI-N87 gastric cancer cells, and SH-SY5Y neuroblastoma cells. Noncancerous mammary epithelial MCF10A and epithelial breast cancer MCF-7 cells were resistant to MBQ-167. MBQ-167 inhibited viability and induced apoptosis in gefitinib and lapatinib resistant SKBR3 breast cancer cells.2 MBQ-167 inhibited triple negative breast cancer tumor growth and lung metastasis in a mouse model.3 Active in vivo.
