| Category                   | Molekularbiologie                                                                                                                               |
| Species Reactivity         | Mouse                                                                                                                                           |
| Product Description        | Mouse TMEM229B Expression-Ready ORF Clone in Mammalian Expression Vector pCMV3-C-GFP, with C-Terminal GFP tag. Approximately 10 ug per unit.... |
| Concentration              | Worldwide                                                                                                                                       |
| NCBI                       | <a href="#">128731</a>                                                                                                                          |
| UniProt                    | 161145                                                                                                                                          |
| Purity                     | The insert is confirmed by full-length sequencing with the sequencing primers listed.                                                           |
| Form                       | Lyophilized                                                                                                                                     |
| Application Notes          | Most commercially available competent cells are appropriate for propagation of the plasmid, e.g. TOP10, DH5a, and TOP10F.                       |
