| Species Reactivity         | Human                                                                                                                                                                                                                                                          |
| Product Description        | siRNA to inhibit SPATA8 expression using RNA interference...                                                                                                                                                                                                   |
| UniProt                    | <a href="#">Q6RVD6</a>                                                                                                                                                                                                                                         |
| Purity                     | > 97%                                                                                                                                                                                                                                                          |
| Form                       | Lyophilized powder                                                                                                                                                                                                                                             |
| Application Notes          | We recommends transfection with 10 nM - 100 nM siRNA 48 to 72 hours prior to cell lysis. Before resuspending, briefly centrifuge the tube to ensure the lyophilized siRNA is at the bottom of the tube. Resuspend the siRNA oligos to an appropriate concentra |
