## Product Datasheet

### Mouse IFNa11(Interferon Alpha 11) ELISA Kit EBT-ELK8253

|                            |  |
|----------------------------|--|
| Article Name               | Mouse IFNa11(Interferon Alpha 11) ELISA Kit  |
| Biozol Catalog Number      | EBT-ELK8253  |
| Supplier Catalog Number    | ELK8253  |
| Alternative Catalog Number | EBT-ELK8253-96,EBT-ELK8253-48,EBT-ELK8253-96X5   |
| Manufacturer               | ELK Biotechnology  |
| Category                   | Kits/Assays  |
| Species Reactivity         | Mouse  |
| Concentration              | 1000 pg/mL   |
| Range                      | 15.63-1000 pg/mL   |
| Sensitivity                | 6 pg/mL  |
| UniProt                    | <a href="#">Q61716</a>   |
| Samples                    | serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids |

## Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Human gene deletion,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse IFNa11. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse IFNa11. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse IFNa11, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse IFNa11 in the samples is then determined by comparing the OD of the samples to the standard curve
