| Species Reactivity         | Human                                                                                                                                                                                                                                                                          |
| Immunogen                  | Recombinant full-length human EGFR protein                                                                                                                                                                                                                                     |
| Product Description        | This MAb recognizes a protein of 170kDa, identified as EGFR. EGFR is type I receptor tyrosine kinase with sequence homology to erbB-1, -2, -3 -4 or HER-1, -2, -3 -4. It binds to Epidermal Growth Factor (EGF), Transforming Growth Factor- $\alpha$ (TGF- $\alpha$ ), Hep... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                                     |
| Clone Designation          | [rGFR/1667]                                                                                                                                                                                                                                                                    |
| Molecular Weight           | ~170kDa (wild type) and ~145kDa (vIII variant)                                                                                                                                                                                                                                 |
| Isotype                    | IgG1                                                                                                                                                                                                                                                                           |

|         |                                                                                                                                                                            |
