| Immunogen                  | Recombinant full-length human Histone H1 protein                                                                                                                                                                                                              |
| Product Description        | Eukaryotic histones are basic and water-soluble nuclear proteins that form hetero-octameric nucleosome particles by wrapping 146 base pairs of DNA in a left-handed super-helical turn sequentially to form chromosomal fiber. Two molecules of each of th... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [HH1/1784R]                                                                                                                                                                                                                                                   |
| Molecular Weight           | 30kDa                                                                                                                                                                                                                                                         |
| NCBI                       | <a href="#">3005</a>                                                                                                                                                                                                                                          |

|      |                                                                                                                                          |
