| Immunogen                  | Recombinant fragment (around aa1-100) of human BAX protein<br>(exact sequence is proprietary)                                                                                                                                                                |
| Product Description        | Recognizes a protein of 21,0kDa, identified as the Bax protein. This MAb is highly specific to Bax and shows no cross-reaction with Bcl-2 or Bcl-X protein. Bcl-2 blocks cell death following a variety of stimuli. Bax has extensive amino acid homology... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                   |
