| Product Description        | Recombinant Human Retinoschisin (RS) is a purified Prokaryotic Protein. Purity: >95% by SDS-PAGE. Host: E. coli. Endotoxin Level: <1.0EU per 1ug, by the LAL method. Species: Human (Homo sapiens). Target Name: Retinoschisin (RS). Target Synonyms: RS1,... |
| Molecular Weight           | 53kDa                                                                                                                                                                                                                                                         |
| Tag                        | N-Terminal His and GST Tag                                                                                                                                                                                                                                    |
| NCBI                       | <a href="#">6247</a>                                                                                                                                                                                                                                          |
| Buffer                     | PBS, pH7.4, containing 0.01% SKL, 5% Trehalose.                                                                                                                                                                                                               |
| Expression System          | Prokaryotic Expression                                                                                                                                                                                                                                        |
