| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | This gene encodes a family member of serine/threonine p21-activating kinases, known as PAK proteins. These proteins are critical effectors that link RhoGTPases to cytoskeleton reorganization and nuclear signaling, and they serve as targets for the sm... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Molecular Weight           | 65kDa                                                                                                                                                                                                                                                         |
| NCBI                       | <a href="#">5058</a>                                                                                                                                                                                                                                          |

|                    |                                                                                                                                                     |
