| Immunogen                  | Recombinant protein (or fragment). This information is considered to be commercially sensitive.                                                                                                                       |
| Conjugation                | Unconjugated                                                                                                                                                                                                          |
| Product Description        | Enables poly(A)-specific ribonuclease activity. Involved in exonucleolytic catabolism of deadenylated mRNA and positive regulation of cell population proliferation. Located in nucleus. Part of CCR4-NOT complex.... |
| Clonality                  | Polyclonal                                                                                                                                                                                                            |
| Molecular Weight           | 34kDa                                                                                                                                                                                                                 |
| NCBI                       | <a href="#">9337</a>                                                                                                                                                                                                  |

|                    |                                                                                                                                                                                                                                                                                     |
